DESCRIPTION

The ILE adjustable task lamp comprises a painted aluminum base, reflector, stem, and base lamp holder assembly. A magnetic ball-joint mechanism on the top of the stem allows smooth adjustment of the shade. The base element contains a dedicated LED light source.

Just as with folding chairs compared to normal ones, clamp lamps don't reach the same status as table lamps. It seems unfair, as clamp lamps are very useful. Maybe it is linked to their unique use and the fact that when not clamped they look like infirms, unable to stand on their own without losing their balance or falling over.
