DESCRIPTION

The String Light presents itself as a modern lighting solution with a fascinating design concept that allows for many installation options. The most striking feature is that while many other light fixtures try to hide their cable connections as good as possible, the String Light purposefully uses the cables as a design element. By means of hooks and eyes, the pendant lamp can be arranged within the room in various ways – patterns, graticules or complex geometrical forms – no limits are set to your imagination when arranging these lights.
